Tone Trixie - rear-wall XLR fit template - 1:1 - viewed from BEHIND (outside)

7 mm gap (board raised to fit the combo). Register BOX-CENTRE to the box centre; z=0 to where the rear RIM meets the cavity. PRINT 100%, ruler-check

barrel bottom -2.30 vs recess floor -1.83 -> ~0.5 mm: file a touch off the ring / grind a hair

50.0 mm - CHECK WITH RULER (confirms 1:1)

Path: recessed lid centre + grind ~2 mm rear rim for the barrel + file a touch off the 30 mm ring. Mirrored (behind view). From enclosure.py.
